14th European Conference on Visual Information Processing EUVIP 2026

IEEE Benelux Section

EURASIP

28.09.2026 – 01.10.2026
Luxembourg

Organizing Committee

General Chairs

Djamila Aouada, SnT, University of Luxembourg, Luxembourg
Azeddine Beghdadi, Universite Sorbonne Paris Nord, France

Technical Program Chairs

Enjie Ghorbel, CRISTAL, ENSI, University of Manouba, Tunisia
Mihai Mitrea, Telecom Paris Sud, France
Anis Kacem, SnT, University of Luxembourg, Luxembourg

Important Dates

Tutorial Proposals: 15 May 2026

Tutorial Notifications: 20 May 2026

Paper Submissions: 21 May 2026

Paper Notifications: 18 July 2026

Demo Submissions: 15 July 2026

Demo Notifications: 18 July 2026

Camera Ready Paper Submissions: 25 July 2026

Project Dissemination Papers Submissions: 30 July 2026

Project Dissemination Papers Notifications: 15 August 2026

Special Sessions Submissions: 30 April 2026

Special Sessions Notifications: 8 May 2026

Call for Special Sessions

The Organizing Committee of EUVIP 2026 (European Workshop on Visual Information Processing) invites proposals for Special Sessions to complement the conference technical program.

Special Sessions aim to highlight emerging, high-impact, and focused research topics within the broad field of visual information processing. Proposals should address cutting-edge scientific challenges, novel methodologies, or rapidly evolving application domains that are of strong interest to the EUVIP community.

In addition to focussed sessions, cross-disciplinary and forward-looking topics—especially those bridging visual processing with fields such as machine learning, multimodal systems, computational imaging, or applied domains—are particularly encouraged.

Each Special Session is expected to:

- Provide a coherent and clearly defined theme
- Attract high-quality contributions from leading researchers
- Stimulate discussion and future research directions

Broad or generic topics already covered by regular EUVIP tracks should be avoided.

Submission Instructions:

Proposals should include:

1. Session Title and Description

A clear and engaging description (less than 1 page) covering:

- Motivation and rationale
- Relevance to EUVIP
- Key topics and scope
- Expected scientific and/or application impact

2. Organizers

- Names, affiliations, and contact details
- Short biographies highlighting expertise and relevance to the topic

3. Tentative Contributions

- A preliminary list of potential contributing authors and papers (if available), demonstrating the session's attractiveness and viability

Session Format:

- Each Special Session will include 4–5 accepted papers
- All submissions will undergo the standard peer-review process of EUVIP
- Accepted papers will be published in the official conference proceedings
