Special Sessions Submissions: 15 May 2026

Special Sessions Notifications: 23 May 2026

Student Sessions Submissions: 31 July 2026

Student Sessions Notifications: 15 August 2026

Call for Student Session

EUVIP 2026 invites BSc, MSc, and early-stage PhD students to contribute to the EUVIP 2026 Student Poster Session.

The EUVIP 2026 Student Session aims to promote interactions and exchanges between early-stage researchers, providing a unique opportunity to integrate into an international conference, showcase ongoing research, and receive constructive feedback from leading experts in academia.

Submission Instructions:

- To participate students are encouraged to submit a two-pages extended abstract presenting their research, results and scientific perspectives (including figures, tables, and references).
- Note: Do not submit a poster file. Posters will be created and presented in person only by authors of accepted abstracts). All submissions must be in English, and use the IEEE one-column format. We recommend using the Word or LaTeX templates (available at <https://euvip2026.github.io>) and ensuring your page setup uses the A4-size layout. Abstracts that do not conform to these guidelines will not be considered.
- The submission of an extended abstract implies the intention of the student to register to EUVIP 2026 and present their work in the student poster session
- All contributions will be peer-reviewed, and evaluated according to their scientific rigour, originality and their potential for future developments.

Registration & Presentation:

EUVIP 2026 requires each accepted student abstract to be presented in-person at the conference site during the dedicated student session.

Eligibility & Originality:

- **Student status:** The first author and presenter must be a registered BSc, MSc, or PhD student at the time of submission.
- **Scope:** The presented work can include the student thesis progress, ongoing research, preliminary results, or late-breaking findings aligned with the core themes of EUVIP 2026.
- **Originality:** By submitting a manuscript, the authors guarantee that it has not been previously published elsewhere in a substantially similar form. Please note that there are no formal proceedings for this session, and the abstract will not be officially indexed

Submission Instructions:

Further questions regarding the Student Session may be directed to the chairs:

tlibamaroine3@gmail.com

shekoufeh.gorgizadeh@uni.lu

Awards:

The best student poster selected by a dedicated committee, will receive an award certificate.
